

Hajjat Tours & Travel – Environmental & Waste Management Guidelines

Purpose

These guidelines aim to reduce environmental impact during daily operations and tours while promoting responsible and sustainable practices among staff, guides, and partners.

Waste Reduction

- Avoid unnecessary printed materials; use digital communication whenever possible
- Reduce single-use plastics where feasible
- Encourage guests to use refillable water bottles when possible
- Collect and dispose of waste responsibly during tours

Responsible Tour Operations

- No littering during tours or activities
- Respect natural landscapes, protected areas, and archaeological sites
- Avoid disturbing wildlife or removing natural or cultural items
- Follow local environmental regulations at all times

Energy & Resource Awareness

- Encourage energy and water efficiency in offices and during tours
- Avoid unnecessary engine idling
- Support operational practices that reduce fuel consumption when possible

Supplier Awareness

- Prefer suppliers that demonstrate responsible environmental practices where available
- Communicate sustainability expectations clearly with local partners

Continuous Improvement

Hajjat Tours & Travel continuously reviews its environmental impact and seeks realistic, achievable improvements aligned with local conditions in Jordan.
